## **Special Events and Notes for Zobel/Silder 4's**

Hooray September is here, a new school year is starting and we are ready to start adventures filled with fun, discoveries and many, many accomplishments.

**Space-** Our first unit is space. We will talk about the number of planets, their names, and something about each one. We will learn a song about the planets, do artwork, read about space, bake bread dough suns, and watch the movie “Magic School Bus Gets Lost in Space.” We will culminate this unit by having lunch on the moon, Friday, September 21. **Each child will need to bring in a pillow for a special moon story time. Please make sure to put your child's name on the pillow!**

**Science-** Our science program will be starting the week of September 10<sup>th</sup>. For the next few months our theme is “The Fundamentals of Science.” Each week the children will learn a new word (we will need to spend a bit more time on a few of the words), and do some fun hands-on activities to help them understand the word. Our science words for this unit are; observe, collect, estimate, measure, classify, sequence, predict, and experiment. We will be using these words throughout the year. We will post the word we are discussing on our outside wall, and your child will bring home each word as we finish it.

**Classroom Visiting Day-**Every Friday parents are encouraged to spend a few minutes letting your child show you their artwork or other things of interest in the classroom. This should be your special time with your child in the classroom.

**Requests-** Remember to start collecting beautiful junk. This month we are in need of shoeboxes with lids, frosting containers with lids, yogurt containers with lids, empty food boxes for our play kitchen.

**It is great to be back in school. We can't wait to get to know you and your children!!**

**Mrs. Zobel & Mrs. Silder**
